Zusätzliche Informationen:

PROCESS

-  Print - blue - Pantone 2925 C
-  Print - blue - Pantone 2925 C
-  Laser engraving
-  Cut out

Ihnen steht es frei, Ihre Farben nach Belieben zu wählen, um Ihre Prozesse zu beschreiben. Allerdings ist es entscheidend, dass Sie für den Farbdruck Pantone-C-Farben verwenden.

Sollten Sie keine spezifische Pantone-C-Farbe angeben, werden wir eine für Sie auswählen und sie in Ihrem Design-Proof vermerken.

The print colours should be specified with a pantone colour if possible.
Please note that we can only print colour gradients in offset printing.
Therefore, the font cannot be engraved additionally.

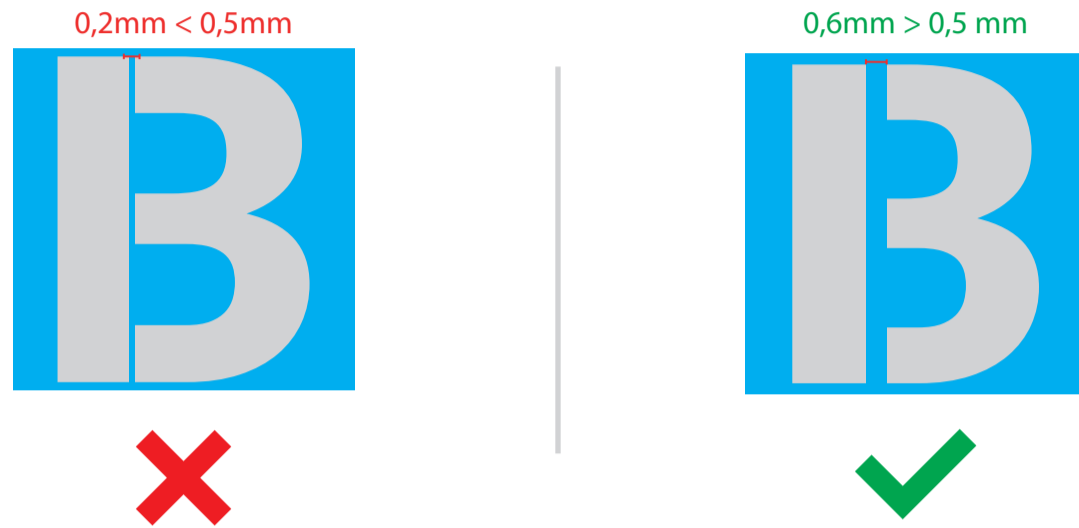

Please note that the processing of the card (colour printings and engravings) should have a distance of 0,5mm to the edge.
It is also possible to print and engrave up to the edge, but this will incur additional costs.
Please ensure that all fonts and graphics are converted to paths and contour lines.

With cut outs it is important that there is always a connection to the cards,
so that the spaces between the letters do not fall out.

The distance between two cutouts must be at least 0.5mm.

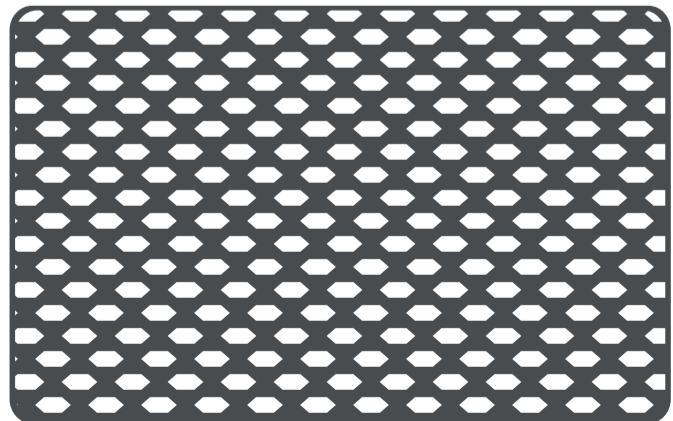

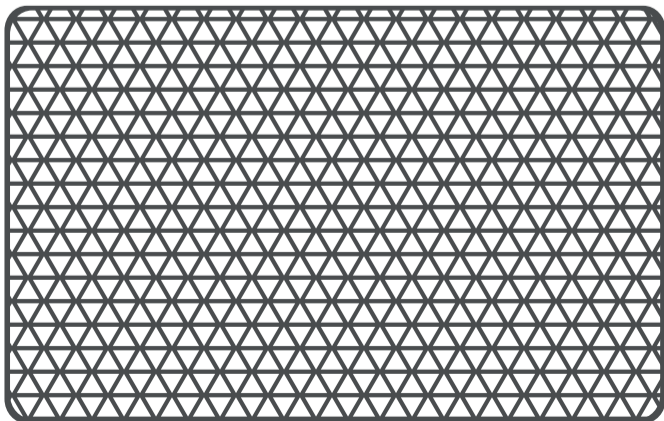

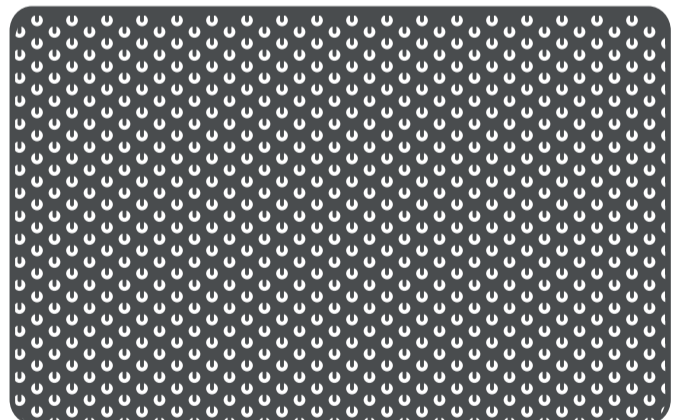

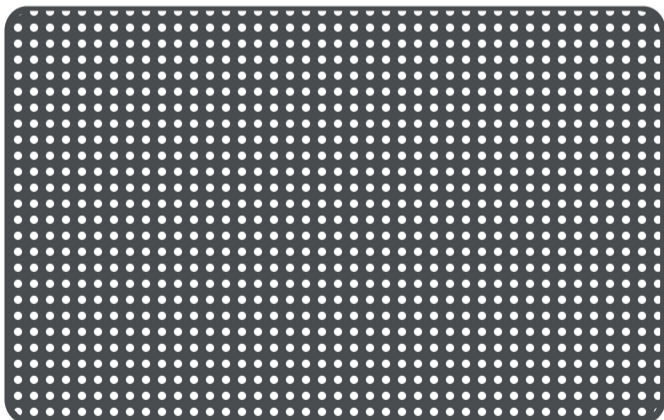

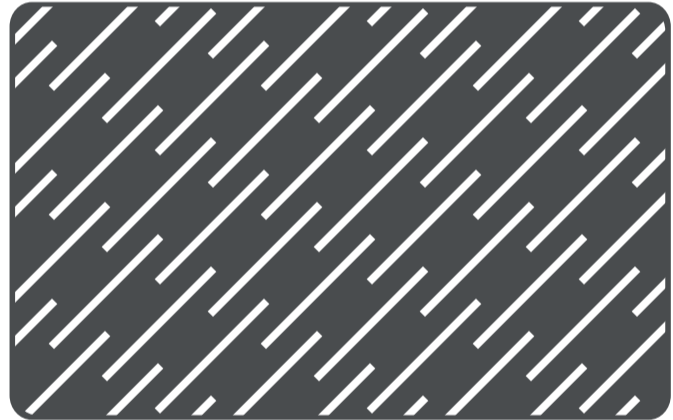

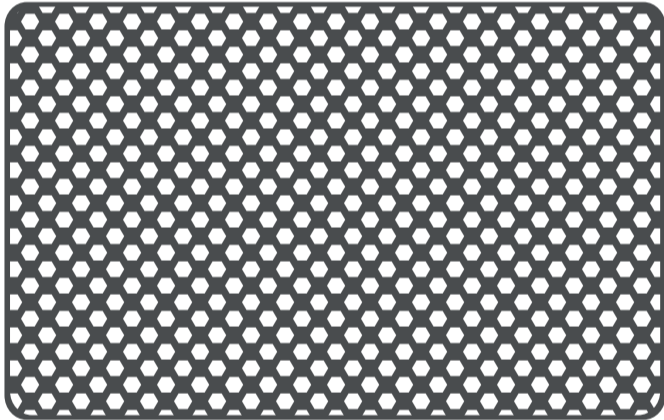

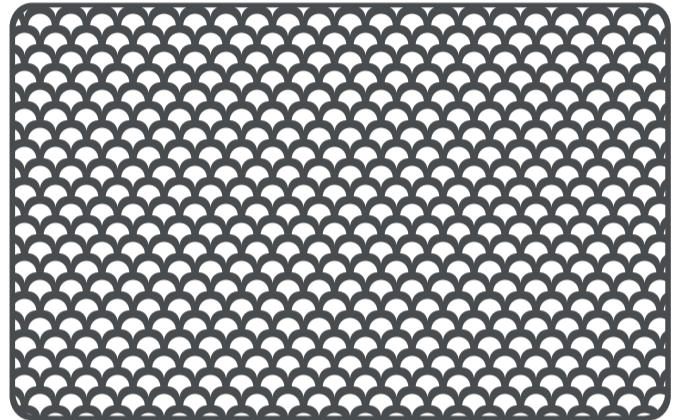

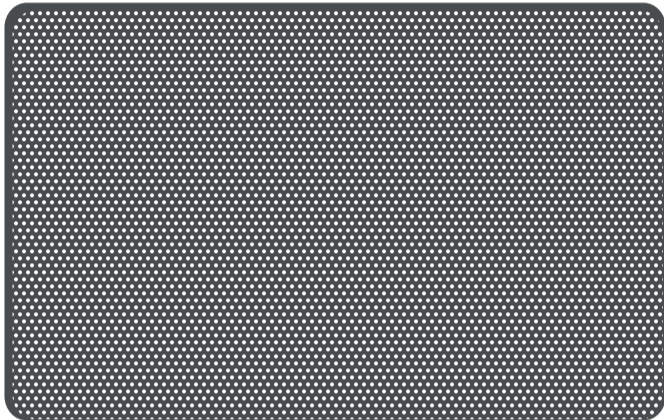

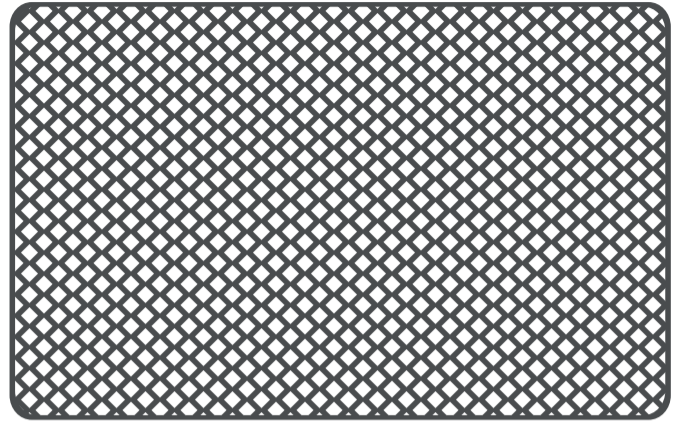

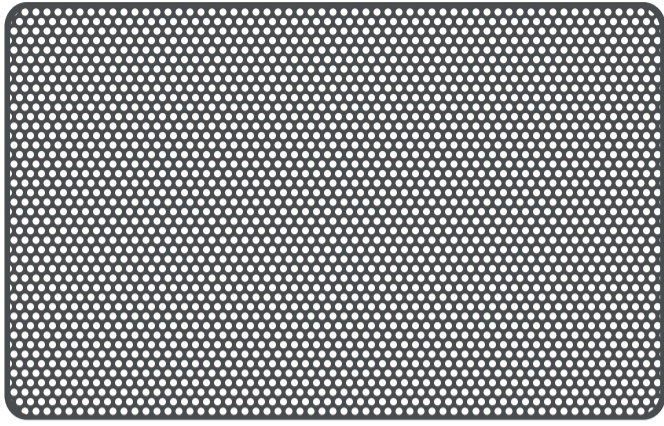

Please note that the graphics on the reverse side of cut outs are mirror-inverted.

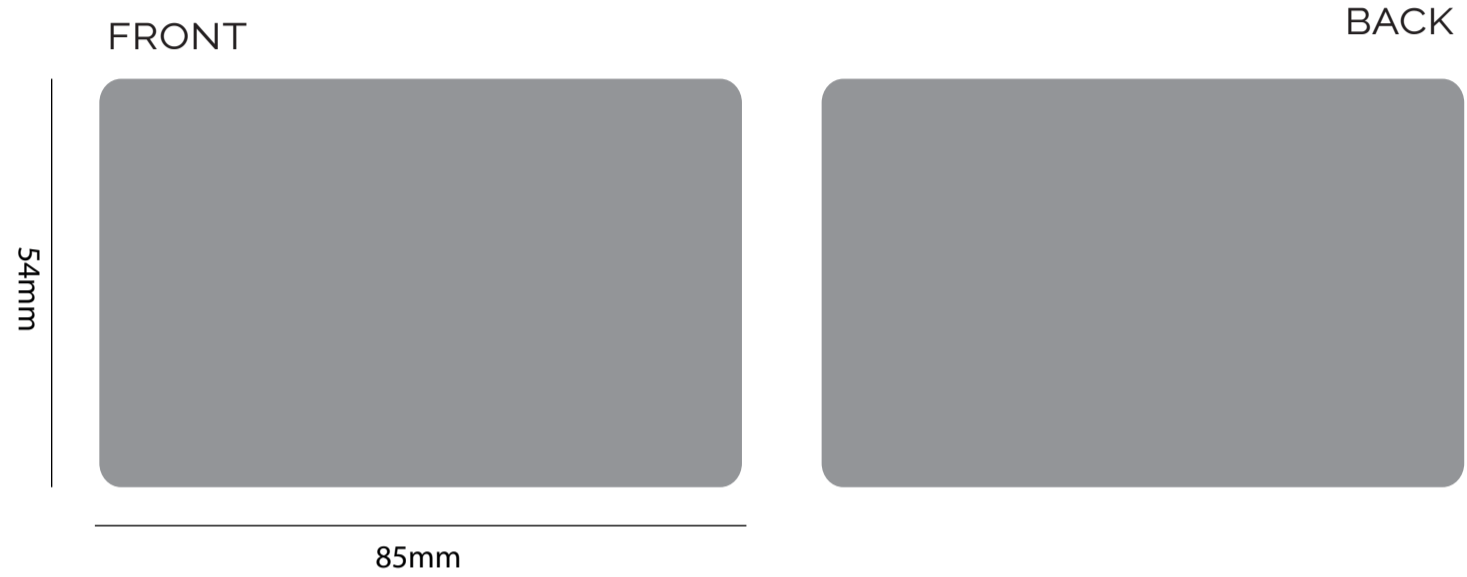

The shapes of the cards are freely selectable and without additional costs, as long as they do not exceed the 85 * 54mm of the normal card size. The radius of the cards should be over .1".
