

## DESIGN TEMPLATE

### Spezifikationen

Kartentyp / Card type: **Stainless Steel**

Stückzahl / Amount: **100**

Stärke / Thickness: **0.5 mm**

Größe / Size: **85\*54mm**

Surface finishes „Front“: **Natural finish**

Surface finishes „Back“: **Brushed finish**

Extras:

#### Front - Bearbeitung / Crafts

-  Print - blue - Pantone 2195 C
-  Print - blue - Pantone 2195 C (individual data)
-  Laser engraving
-  Cut out

#### Back - Bearbeitung / Crafts

-  Cut out

You have complete freedom in choosing colors to describe your processes. Additionally, you can add any markings on or next to the cards to include further notes.

The print colors should ideally be specified as Pantone C colors to ensure optimal print results. In certain cases, we can also produce your cards using UV printing if a color gradient is absolutely necessary.

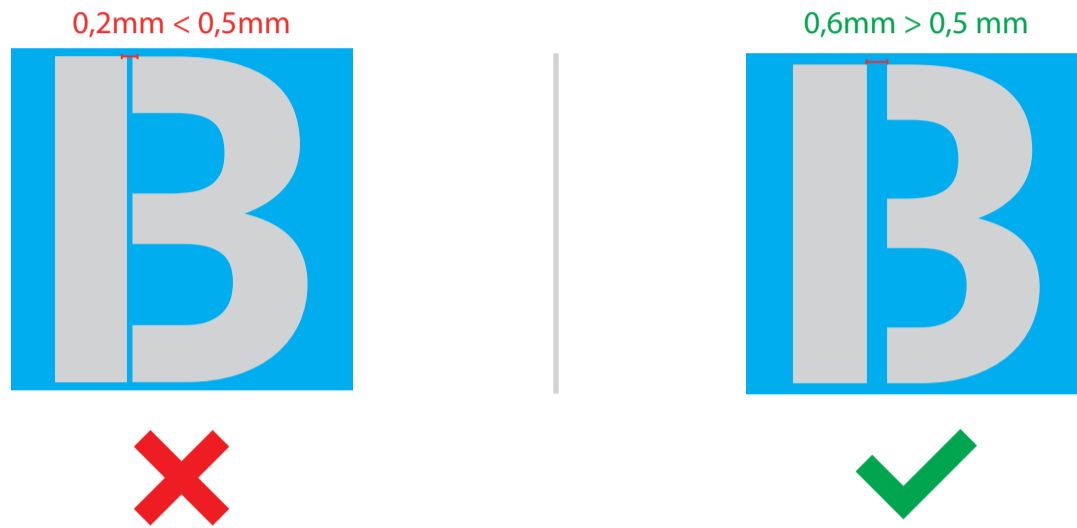

Please ensure that all design elements to be printed maintain a distance of 1 mm from the edge of the card.

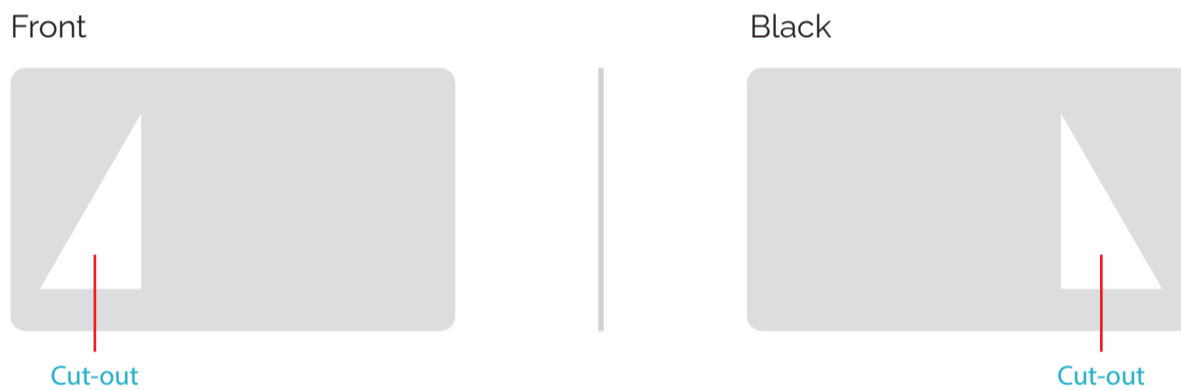

For cut-outs, ensure there is always a connection to the metal so that inner parts (e.g., the spaces within letters) do not fall out.

The distance between two cut-outs must be at least 0.5 mm; otherwise, the cut-out areas may merge. This applies to a card thickness of 0.5 mm. For a thickness of 0.8 mm, the distance between two cut-outs must be at least 0.8 mm.

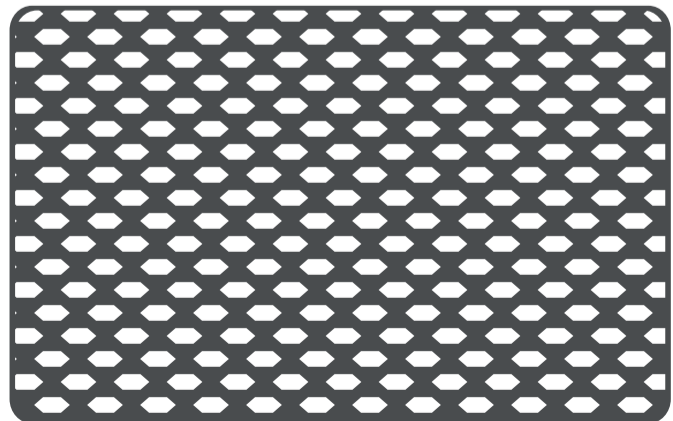

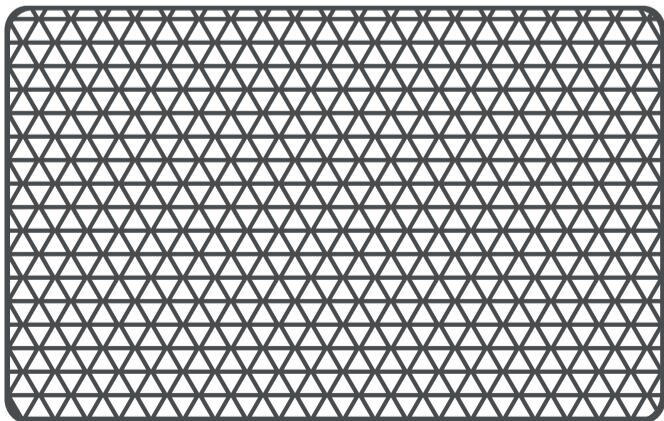

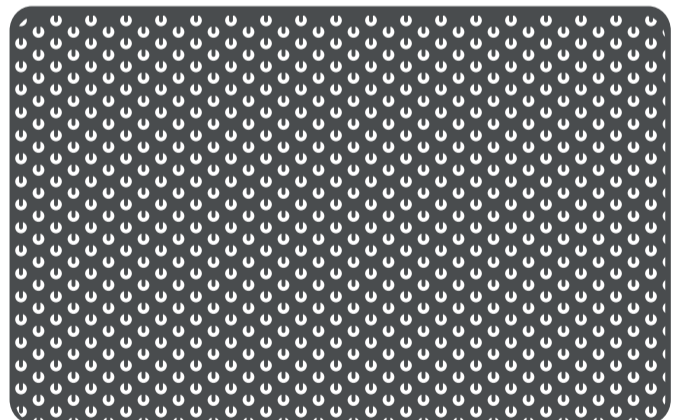

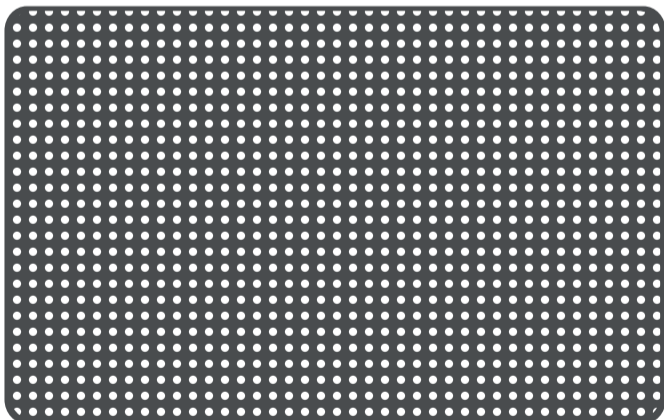

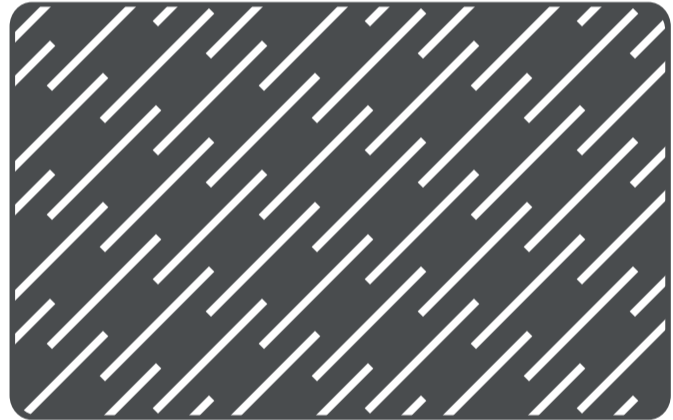

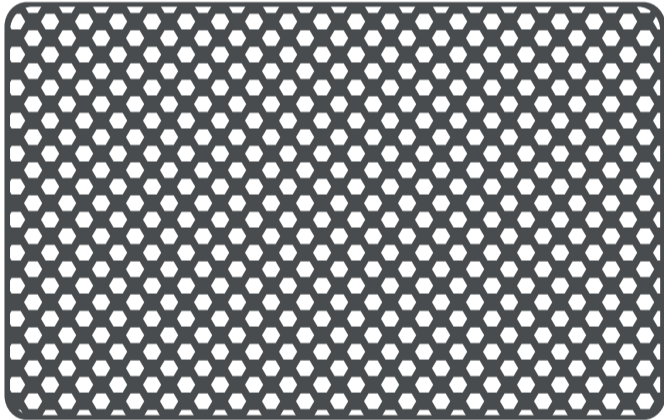

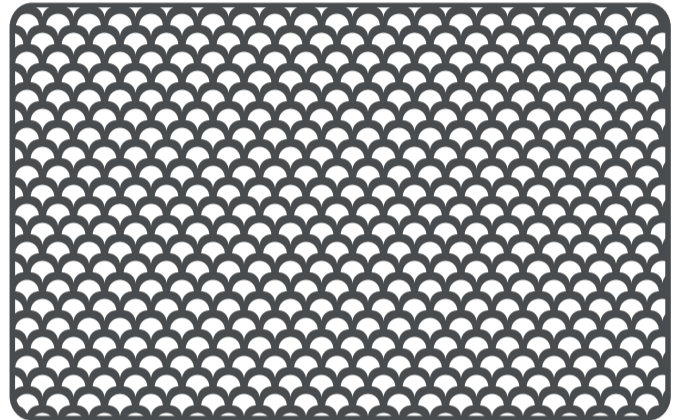

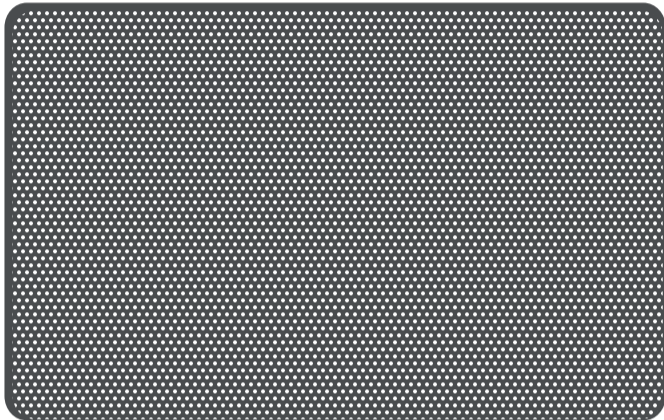

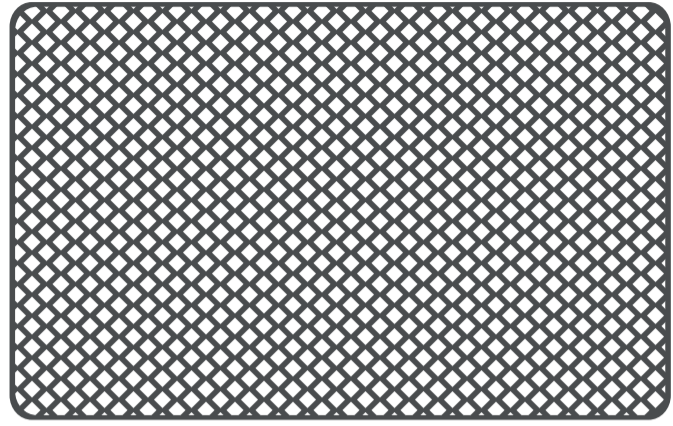

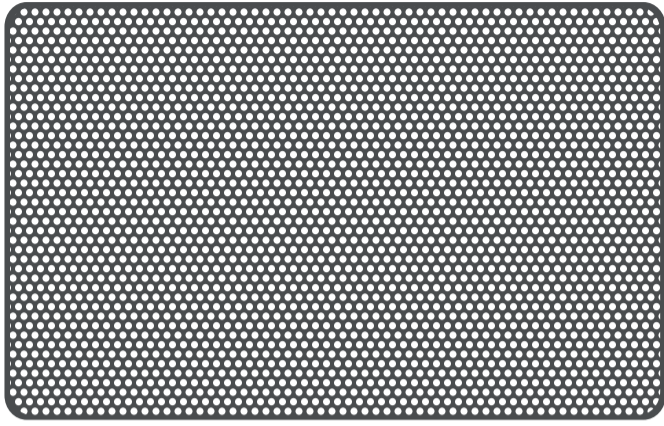

Please ensure that for cut-outs, the graphics on the reverse side are mirrored and correctly aligned.

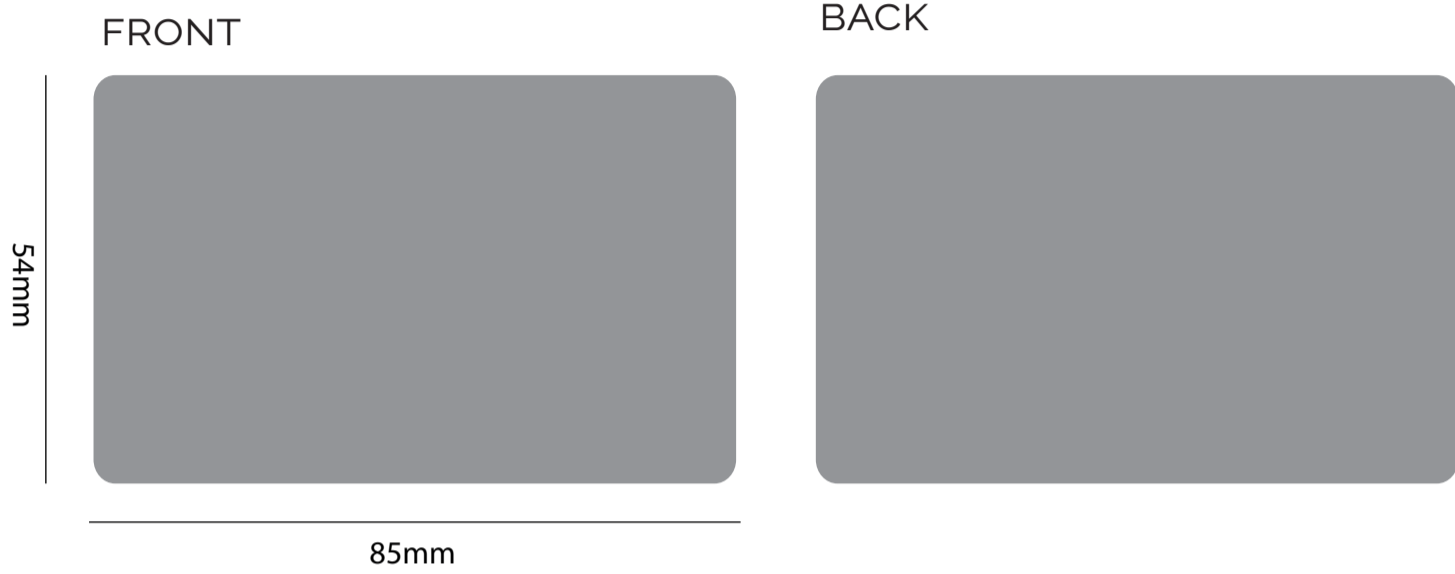

Card shapes can be freely chosen at no extra cost, provided they do not exceed the standard dimensions of 85 x 54 mm. The corners should have a minimum radius of 1 mm to prevent sharp edges.
